FCC, There are more than 1.7 million subscribers to satellite radio, and this number grows daily. Who cares what the networks think? This number alone should tell you what a growing number of Americans think of mainstream radio. Like me, they are probably sick and tired of all the commercials and obnoxious small talk on their radio dials. I have invested a considerable amount of money to enjoy commercial free music and talk radio, not only in my home, but also in my office and car. I feel as an American I should continue to have the right to have whatever radio I wish to listen to. I am asking you to PLEASE reject the NAB'S petition 04-160.

THANK YOU,  
DEE KREITER
